

DIVYA PRAJAPATI

☎ 857-313-5410 ✉ divya02698@gmail.com [in linkedIn](#) [github](#) [Portfolio](#) 📍 Boston, MA (Open to Relocate)

Education

Northeastern University

Master of Science in Computer Software Engineering Systems

Sep. 2022 – Dec 2024

Boston, MA

Experience

JerseyStem

Software Developer

Jan 2025 – Present

Jersey city, New Jersey

- Developed automation tools with **Google Apps Script**, **MySQL**, and **Python** to handle onboarding for 100+ volunteers, cutting monthly manual processing time by ~15 hours.
- Built **ETL pipelines** in **Python** and **SQL** to extract **Jira** metadata into structured relational models, reducing manual tracking by 70%.
- Designed normalized schemas and indexed lookup queries in **MySQL** for fast volunteer and project mapping, applying relational design and tree traversal techniques.
- Scheduled 200+ recurring meetings/month using **TypeScript** and Google Calendar API, saving ~10 hours/week.

Reveal AI

Full stack Developer

Jan 2024 – Aug 2024

Palo Alto, California

- Launched an **AI**-powered Interview Bot, enabling large-scale conversational interviews to gather feedback from users, implemented using **OpenAI's LLM**, **Node.js**, and **MongoDB**, boosting engagement by 60%.
- Engineered a RAG-based factuality validation pipeline using **Pinecone** for vector search and **OpenAI APIs**, improving **LLM** response accuracy by 35% and reducing **hallucination**-related **QA** flags by 80% in benchmark evaluations.
- Led frontend development of an interactive progress bar and feedback form using **TypeScript**, collecting structured input from 1,000+ users and enabling faster product iterations.
- Delivered a **Next.js** analytics dashboard integrated with **AWS Lambda** and **EC2**, enabling secure access for 500+ users/month and supporting real-time performance analytics.
- Orchestrated **CI/CD pipelines** using **Jenkins**, **JUnit**, and **GitHub Actions**, reducing deployment time by 40%.

Barrier Break

Software Developer

Feb 2022 – Aug 2022

Mumbai, Maharashtra

- Implemented 30+ accessible and **WCAG**-compliant React and Angular components with Redux for a web platform, enhancing UX and state management across shopping and checkout flows.
- Architected scalable **REST APIs** using **Java Spring Boot** and **MongoDB**, supporting up to 5,000 concurrent sessions with AWS auto-scaling to ensure 99.9% uptime.
- Integrated monitoring tools like **CloudWatch** and **Kibana** with automated alerting, reducing reported bugs by 22%.

Atmik Bharat

Software Engineer

Jan 2019 – Aug 2023

Mumbai, Maharashtra

- Led the development of a custom ERP system using **Java** and **SQL Server**, improving pharmaceutical inventory and billing workflows across 20,000+ records, boosting operational efficiency by 70% (**initially built in .NET C#**).
- Developed 25+ **RESTful APIs** using **Java (Spring Boot)**, following clean architecture principles to support coupon creation, validation, and usage tracking, improving campaign performance and system scalability.

Projects

OpenAI Model Evaluation Tool | (Python, Airflow, FastAPI, GCP, AWS RDS, Docker)

Sep 2024 – Dec 2024

- Engineered a **Streamlit** interface for model benchmarking workflow, reducing manual effort by 80%, by implementing an **Airflow ETL** pipeline to extract, process, and store text from **Hugging Face GAIA** dataset PDFs.
- Refined document text extraction accuracy by 35% by integrating **PyMuPDF**, **ADOBE PDF Extract**, and **Azure AI Document Intelligence** into a cloud-based pipeline.
- Reduced API response time by 40% and enhanced system scalability by developing a **FastAPI** with **JWT authentication**, asynchronous request handling, and **AWS RDS** integration and **Docker** deployment for consistency across environments.

Technical Skills

Programming Languages: Java, Python, C#, C++, JavaScript, TypeScript

Web Frameworks: React.js, Next.js, Node.js, Express.js, Spring Boot, .NET

Database: SQL (MSSQL, MySQL, PostgreSQL), NoSQL (MongoDB, DynamoDB, Cosmos DB)

Cloud/DevOps: AWS (S3, EC2, Lambda, SQS, SNS), GCP, Docker, Kubernetes, Terraform, CI/CD

Other Tools: Git, GitHub Actions, JUnit, Oracle, Maven, Playwright, Postman, SonarQube
