Boston, MA (Open to Relocate)

SUMMARY

Full-stack developer with 4+ years of experience building scalable apps using **Java**, **Angular**, **React**, and **microservices**. Skilled in **AWS/GCP**, **CI/CD**, and **Agile methodologies**, with a focus on clean UIs, secure APIs, and end-to-end performance optimization

Master of Science in Computer Software Engineering Systems

Northeastern University

Sep 2022 - Dec 2024

Boston, USA

TECHNICAL SKILLS

Programming Languages: Java, Python, C#, C++, JavaScript(ES6+), TypeScript

Web Frameworks: React.js, Next.js, Angular(v10-15), Node.js, Express.js, Spring Boot, .NET

Database: MSSQL, MySQL, PostgreSQL, MongoDB, DynamoDB, Oracle DB, Cosmos DB

Cloud/DevOps: AWS (S3, EC2, Lambda, SQS, SNS), GCP, Docker, Kubernetes, Terraform, CI/CD pipelines

Other Tools: Git, GitHub Actions, JUnit, Maven, Playwright, Postman, Swagger, SonarQube

PROFESSIONAL EXPERIENCE

Software Developer

JerseyStem

Jan 2025 - Present

New Jersey, USA

- Developed automation tools with **Google Apps Script**, **MySQL**, and **Python** to handle onboarding for 100+ volunteers, cutting monthly manual processing time by ~15 hours
- Built **ETL** pipelines in **Python** and **SQL** to extract **Jira** metadata (issues, labels, attachments, watchers) into structured relational models, enabling real-time reporting and reducing manual tracking by 70%
- Architected relational schema in **MySQL** for project and volunteer data, enforcing normalization and optimizing joins for low-latency reporting
- Automated scheduling for 200+ recurring meetings/month using **TypeScript** and the **Google Calendar API**, reducing conflicts by 40% and saving ~10 hours/week in manual coordination

Full Stack Developer

Reveal AI

Jan 2024 - Aug 2024

San Francisco, USA

- Launched an **AI**-powered Interview Bot, enabling large-scale conversational interviews to gather nuanced feedback from users, built using **OpenAI's LLM**, **React**, **Node.js**, and **MongoDB**, boosting engagement by 60%
- Engineered a **RAG**-based factuality validation pipeline using Pinecone for vector search and **OpenAI APIs**, improving **LLM** response accuracy by 35% and reducing **hallucination**-related **QA** flags by 80% in benchmark evaluations
- Created an interactive progress bar and customer feedback questionnaire using **TypeScript**, improving chatbot usability and capturing structured input from 1,000+ users for product iteration
- Delivered a **Next.js** analytics dashboard integrated with **AWS Lambda** and **EC2**, enabling secure access for 500+ users/month and supporting real-time performance analytics
- Orchestrated **CI/CD pipelines** using **Jenkins**, **JUnit**, and **GitHub Actions**, reducing deployment time by 40%

Software Developer

Barrier Break

Feb 2022 - Aug 2022

Mumbai, IN

- Implemented 30+ accessible and **WCAG**-compliant **React** and **Angular** components with **Redux** for a web platform, enhancing **UX** and state management across shopping and checkout flows
- Architected scalable **REST APIs** using **Java Spring Boot** and **MongoDB**, supporting up to 5,000 concurrent sessions with **AWS** auto-scaling to ensure 99.9% uptime
- Integrated monitoring tools like **CloudWatch** and **Kibana** with automated alerting, reducing reported bugs by 22%

Software Engineer

Atmik Bharat LLP

Jul 2019 - Feb 2022

Mumbai, IN

- Led the development of a custom ERP system using **Java** and **SQL Server**, improving pharmaceutical inventory and billing workflows across 20,000+ records, boosting operational efficiency by 70% (**initially built in .NET**)
- Built 25+ **RESTful APIs** using **Java (Spring Boot)**, following clean architecture principles to support coupon creation, validation, and usage tracking, improving campaign performance and system scalability

TECHNICAL PROJECTS

OpenAI Model Evaluation Tool (Python, Airflow, FastAPI, GCP, AWS RDS, Docker)

Sep 2024 - Dec 2024

- Constructed a **Streamlit** interface for model benchmarking workflow, automating 80% of manual tasks via an **Airflow ETL pipeline** that extracts and processes **GAIA** dataset PDFs
- Optimized document text extraction accuracy by 35% by integrating **PyMuPDF**, **Adobe PDF Extract API**, and **Azure AI Document Intelligence** into a cloud-based pipeline
- Reduced API response time by 40% and enhanced system scalability by developing a **FastAPI** with **JWT** authentication, asynchronous request handling, and **AWS RDS** integration and **Docker** deployment for consistency across environments
